GLASS PARTITIONING UK

## Demountable Glass Partitions

Economical, attractive, plus re-locatable to accommodate the constant needs of a modern business. Most products are ex stock for fast delivery times.

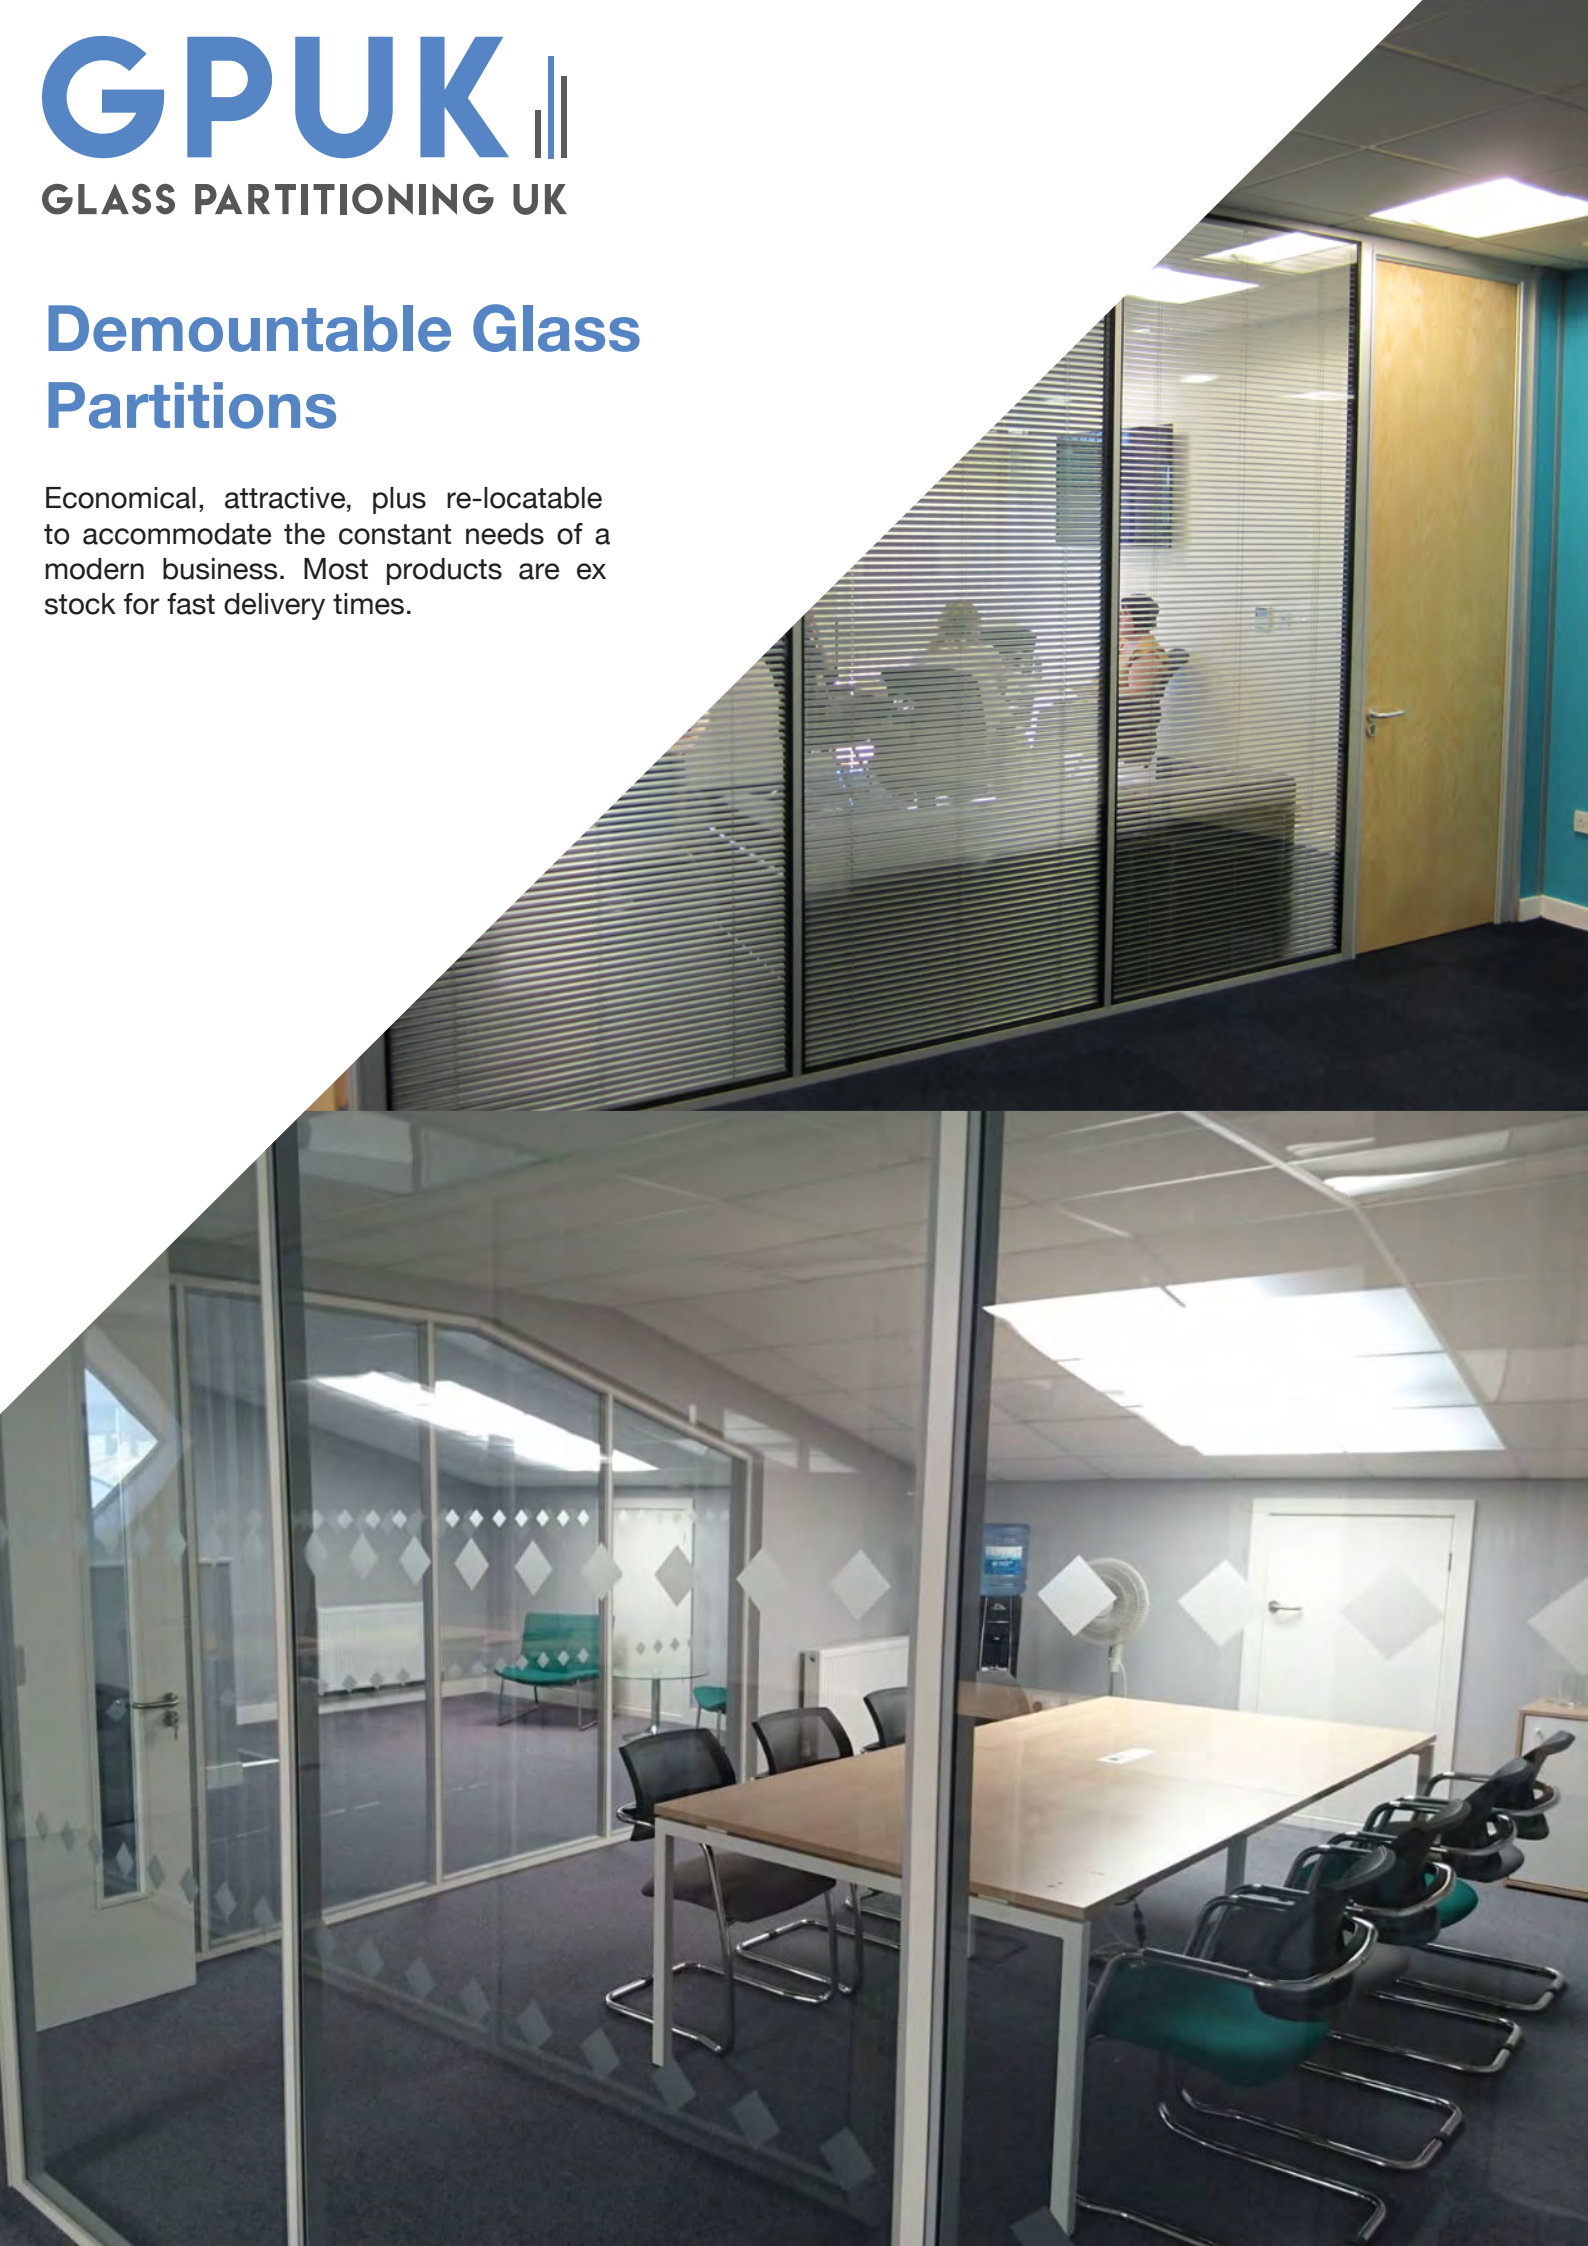

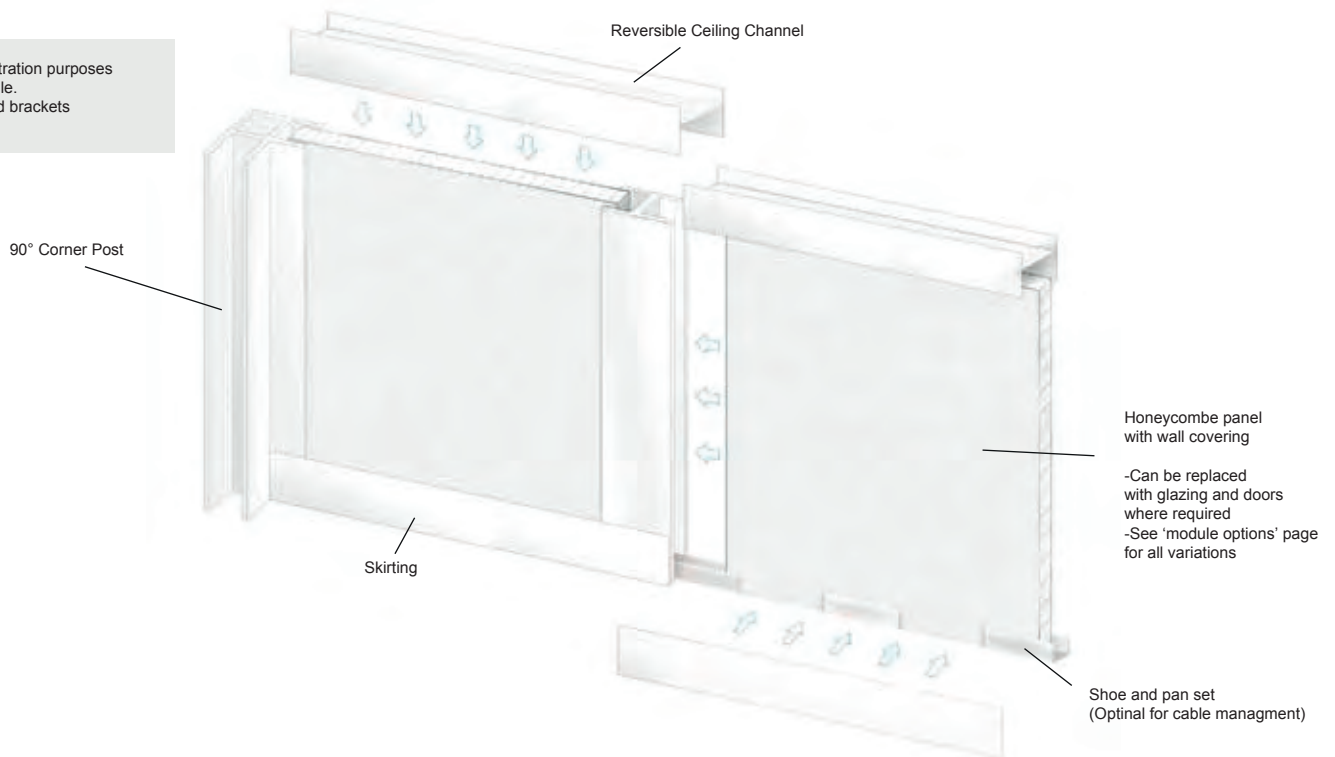

Diagram is for illustration purposes only and not to scale. Screws, fittings and brackets not shown.

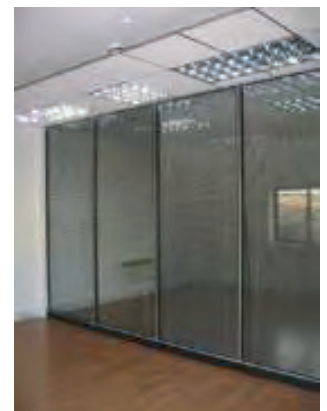

## Construction

This system is constructed using a 46mm honeycomb plasterboard panel located within a 54mm aluminium 'H' section.

The system is very flexible and available in any combination of solid, fully glazed or part glazed modules - see next page for more options.

The system itself is based on a nominal module size of 1200mm with door modules typically 900mm. Any modules can be cut down on site to fit any desired size.

## Benefits

- Fully demountable/Re-locatable – Perfect for changes within an office space.
- Rapid Installation – All framework is pre-finished.
- Flexible module options – Solid, full/half height glass, single/double glazed.
- Wide range of colours and finishes.

## Performance

This system is designed as an economical solution for office divisions and has therefore not been tested by the manufacturer for fire and acoustics (See Fire & Sound 75/100 for performance systems). However, we estimate the system will achieve in the region of 32dB for sound insulation for solid modules.

## Example Cross-sections

The framework for the partition system is available in three standard finishes:

- Satin Anodised Aluminium (SAA)
- White (RAL 9010)
- Pale Grey (BS 00A05)

## Wall Coverings

A wide range of wall coverings are available to decorate the 'solid' plasterboard modules.

The system can be painted, by the contractor's choice is to use the specifically designed wall coverings for a fast installation.

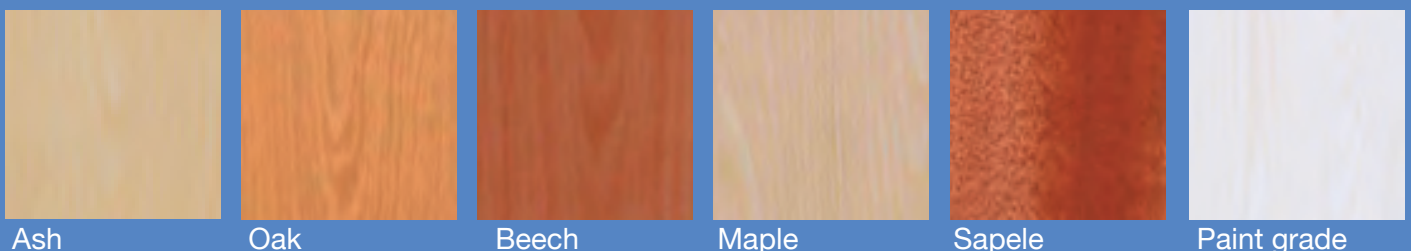

There are over 40 standard finishes available ranging from magnolia to Burnt Orange. Please ask to see full set of sample finishes.

## Doors

We offer a wide range of veneer doors suitable for the partitioning systems. This system typically suits a solid core type door, with the most popular size 1981 x 838 x 44mm

**The most common veneer types are as follows:**

Ash

Oak

Beech

Maple

Sapele

Paint grade

**The most popular include:** To compliment our extensive door range, we can also offer a range of vision panels to suit various requirements.

650x150mm

1500x150mm

450x450mm

## Glazing Service including Venetian Blinds

To compliment our partitioning systems, we also offer a full glazing service including optional blinds. The glass can be provided on a supply only or supply and fit service. The supply and fit service includes a full survey followed by a return visit to fit the glass.

The blinds can be added to the system for additional privacy with either a control wand (single glazed) or control knob (double glazed). A wide range of blind 'slat' finishes are also available.

## Skirting

The system utilises 100mm laminate finished skirting sections. Available in 3 finishes (Black, Grey and White). The skirting is applied using either gripfill or screw fixed.

In this section we have highlighted some different combinations of the system to highlight how flexible it can be and help you make a more informed decision.

<b>Module:</b>	Full Height Glazed (Double Glazed with Blinds)
<b>Frame:</b>	SAA - Satin Anodised Aluminium
